ONE OK ROCK UNVEIL BRAND NEW TRACK "PUPPETS CAN'T CONTROL YOU" — [LISTEN](#)

FORTHCOMING ALBUM *DETOX* ARRIVES EVERYWHERE FEBRUARY 21

PRE-ORDER + PRE-SAVE [HERE](#)

Fueled By Ramen band **ONE OK ROCK** have today released a brand new track "Puppets Can't Control You," available now at all streaming services — [LISTEN HERE](#).

The song was exclusively premiered during the first episode of the nationally televised drama *Mikami Sensei* in the band's native Japan just before its digital

release, and will be featured on ONE OK ROCK's much-anticipated, forthcoming album **DETOX**, which arrives everywhere February 21 and available for [pre-order + pre-save](#) now.

Featuring a number of acclaimed producers including multiple GRAMMY® winner Rob Cavallo and GRAMMY® nominees Dan Lancaster and Pete Nappi, **DETOX** marks the band's 11th full length, studio release and set to arrive as the band celebrates their 20th anniversary next year.

Last month, the band heralded the announcement of **DETOX** by sharing the singles "[+Matter](#)," along with an official music video, joining previously released album tracks "Delusion:All" and "Dystopia." The band performed "+Matter" ahead of its release during their recent "2024 Premonition World Tour," which was enjoyed by nearly 200,000 fans over just eight shows across seven different countries last month. Standing out as their largest global run to date, the tour notably showcased their massive full-scale stadium show in Europe and North America for the first time ever.

ONE OK ROCK recently announced details for their 2025 Latin American tour, which kicks off in Mexico at the Tecate Pa'l Norte festival in Monterrey on April 4th, and highlighted by their first trip back to South America since 2017 to play their biggest shows on the continent to date (full itinerary below). ABOUT ONE OK ROCK:

Founded in Tokyo during 2005, the quartet—Taka [vocals], Toru [guitar], Tomoya [drums], and Ryota [bass]—have unassumingly emerged as a global phenomenon and one of Japan's hottest exports with dozens of international gold and platinum certifications and billions of streams. Beyond six consecutive Top 5 entries and three #1 debuts on the Japanese Top Albums Chart, the group's global imprint has grown with a foothold stateside. They stand out as the rare force of nature who can tour alongside either The Smashing Pumpkins or Ed Sheeran—with whom they co-wrote "Renegades" for the film *Rurouni Kenshin: The Final*. Produced by Rob Cavallo (Green Day, My Chemical Romance), ONE OK ROCK's most-recent studio album *Luxury Disease* debuted at #1 in Japan marking the band's fourth straight chart topping album in their home country following the blockbusters *35xxxv*, *AMBITIONS*, and *EYE OF THE STORM*. *Luxury Disease* is highlighted by the singles "Save Yourself," "Let Me Let You Go," and "Vandalize," the latter of which featured as the ending theme for SEGA's *Sonic Frontiers*.
