ABOUT ONE OK ROCK:

Founded in Tokyo during 2005, the quartet —Taka [vocals], Toru [guitar], Tomoya [drums], and Ryota [bass]— have unassumingly emerged as a global phenomenon and one of Japan’s hottest exports with dozens of international gold and platinum certifications and billions of streams. Beyond six consecutive Top 5 entries and three #1 debuts on the Japanese Top Albums Chart, the group's global imprint has grown with a foothold stateside. They stand out as the rare force of nature who can tour alongside either The Smashing Pumpkins or Ed Sheeran — with whom they co-wrote “Renegades” for the film *Rurouni Kenshin: The Final*. Produced by Rob Cavallo (Green Day, My Chemical Romance), ONE OK ROCK’s most-recent studio album *Luxury Disease* debuted at #1 in Japan marking the band's fourth straight chart topping album in their home country following the blockbusters *35xxxv*, *AMBITIONS*, and *EYE OF THE STORM*. *Luxury Disease* was highlighted by the singles "Save Yourself," "Let Me Let You Go," and "Vandalize," the latter of which featured as the ending theme for SEGA's Sonic Frontiers.
